Subject: Cmax

Nancy and Charlotte

The term cmax does not appear in the OW health advisory document. It does appear in the support document, but only in reference to studies that report it---similar to the OPPT 2005 text. Cmax is not used at all in the derivation of the safe level, nor is it found in the appendices. Since we have a PBPK model, it should be easy to do the Cmax comparisons across species for the various critical effects.

Let me know if you need AO support. I do not mind taking the lead, if this is better from your perspective.

Cheers!

Michael...
